A decision was rendered on last Saturday by the court of appeals at Jackson which is of interest to Fayette county people. It was the case of the Union Gin & Lumber Co., of this city against F. H. Lightfoot for damages, it being claimed in the bill filed that Lightfoot had violated a contract made with the Gin Co. by going into the lumber business in this city. The decision upheld the chancery court of this county dismissing the suit of the Gin Co. and in effect holds that Lightfoot can conduct such a business if he so desires.

Miss Christobel Richie is just retiring from the service of the Cumberland Telephone & Telegraph company in this city where she has been an operator for more than two years, and a good one, too. Miss Richie retires for a rest because of her health, and her going will be regretted by the patrons of the local exchange to whom she has been uniformly courteous, polite and accommodating. Her place will be taken on March 1 by Miss Lula Moore who has had considerable experience in the exchange and who will, with more experience, prove a thoroughly competent and efficient operator.

Mrs. G. G. Higgins entertained a number of her married friends Wednesday afternoon, February 24, at 500. The color scheme was red, white and blue, and was beautifully carried out in flowers, score cards and refreshments. Souvenirs given the guests were Washington hats decorated with cherries. For refreshments were served a delightful salad course, and ice cream in red, white and blue adorned with hatchets, and cake covered with cherries. Mrs. Britton won first prize, a dainty piece of embroidery, done by the hostess, and Mrs. Harry Mathis cut the consolation prize, a bottle of toilet water.

It is time to prune fruit trees. It can be remembered that last year The Falcon mentioned the pruning done in our home orchard by Prof. Keffer. Those trees looked then like he had cut away the best part of them, but after a year they now show up in first class shape and one can see the wisdom of his pruning. They have just been pruned for this year and to our way of thinking there is not a more thrifty lot of trees in this section, and the shape is almost ideal in many cases, and it all came of his pruning last year. These trees were sprayed twice last season, except one tree got only one spraying. That tree now shows considerable of the San Jose scale and many of the fruit spurs that would have borne this year were killed by the disease. We are getting ready to spray again for this disease and hope to bring that tree

around allright. The others look like the blood might burst out of them, they are so clean and fresh. It shows what pruning and spraying will do.

Thorough Work.
